

"this IP video solution...is the first of its kind" - Buildings Magazine

## A Breakthrough in Special Event Surveillance

*On Demand Surveillance* is a challenge - only Smartvue offers an easy to use and completely portable professional grade IP video solution with long range wireless and instant remote PC and cell access.

Why install expensive and permanent surveillance when you can setup a Smartvue solution with remote PC and cell phone access in just minutes - right where and when you need it. Smartvue is the only long range wireless (802.11N draft) portable, plug and play video monitoring solution. With wireless range up to quarter mile, indoor and outdoor cameras, track lighting mounts, and self configuring software, Smartvue is easy to use and a snap to install almost anywhere. Quickly and easily move the system (with up to 10 cameras) anywhere you need and record video or monitor from a PC or cell phone at anytime. Smartvue connects to almost any network or can be used stand alone (no computer required). Motion detection alerts can be customized to send as instant text messages to a cell phone or to any email address along with video snap shots. The 1TB archive enables searching through high quality (DVD 720x480 resolution up to 30fps) recorded video instantly as well as saving clips and still images.
